To Whom It May Concern,

I am writing to express my interest in opportunities that align with my academic background in computer science and my diverse set of experiences. Currently, I am an undergraduate student at the University of Toronto, expecting to complete my Honours Bachelor of Science in April 2024. My journey to this point has been marked by a commitment to excellence, adaptability, and a passion for continuous learning.

Having moved to Canada from the Republic of Korea at a young age, I quickly learned the importance of resilience and determination. Despite facing challenges such as language barriers and adapting to a new educational system, I have excelled academically and personally. My experiences have taught me the value of hard work, and I have successfully balanced my studies with meaningful work and volunteer experiences.

During my time at Fraser Heights Secondary School in Surrey, British Columbia, I developed a strong foundation in science and English, which propelled me into my current field of study. I have my academic pursuits with practical experience, working as a salesperson at EB Games, where I honed my customer service and organizational skills, and as an employee at Korean Plastic in Hwaseong, South Korea, gaining insight into manufacturing processes and financial operations.

My commitment to community and leadership is evident through my roles as Vice President of Young Blood For Life, School Administrator for the Vancouver High-School Science Olympics, and a member of Free the Children. These experiences have not only enhanced my organizational and leadership skills but have also deepened my sense of social responsibility.

Serving as an Auxiliary Policeman for South Korea's mandatory military service further developed my discipline, teamwork, and ability to work under pressure. These experiences have equipped me with a unique set of skills and perspectives that I am eager to apply in new environments.

I am proficient in multiple languages, including Korean and English, and have a basic understanding of Chinese. My computer skills include Microsoft Office, Photoshop, and programming in Python, which I believe will be beneficial in various professional settings.

My interests outside of academia and work, such as traveling, playing video games, and following the latest in electronics, have cultivated a well-rounded personality that thrives on exploration and innovation.

I am enthusiastic about the opportunity to contribute to your team, bringing my diverse skills, experiences, and a fresh perspective. I look forward to discussing how I can contribute to your organization's success.

Thank you for considering my application. I am excited about the possibility of contributing to your team and am available for an interview at your convenience.

Sincerely,

Geunchul Shin
